

Steven Taggart (P1th0n):

- BTL addiction, Mild.
- Fake Sin: Criminal Front
- Fake Sin: Personal Front
- Fake License: Cyberware
- Fake License: Cyberdeck
- Fake License: Concealed Carry
- Fake License: Break-in Gear

Ninja Vanish:

Cost: 5 Karma Source: Data Trails

Even the best sometimes get clipped. Maybe you're in a host, holding off some IC, but there are just too damn many of them. Maybe you're in the middle of a firefight and the enemy hacker is getting the best of you, and you're moments away from having your deck reformatted, when sudden-ly, the Matrix glitches. A little localized reset saves your bacon. Just like that. What are the odds, neh? Maybe GOD is on your side? That can't be—you must just be that good. As a Free Action, the character can spend 1 point of Edge to remove all marks a single opponent has on him. Note that in cases where other targets were sharing marks with your target, such as IC in a host, the others also lose their marks.

Digital Doppelganger:

Cost: 7 Karma Source: Run faster

The Matrix is a big place, and with a world so connected and so tied to identity, there are bound to be some crossed signals somewhere. The character's digital identity, including their spending habits, licenses, travel records, and data trail have all been cross-linked with someone else's identity. Anyone doing research on him has a hard time locating any information and faces a +2 threshold for Matrix Searches for tracking the character on this ID. The character must be a SINner, and this quality should be linked to a particular SIN.

Data Anomaly:

Cost: 3 Karma Source: Data Trails

An incessant code tinkerer, you know very effective ways to hide your icon, making it look like nothing more than a piece of errant code. You gain +2 dice when resisting a Matrix Perception test while running silent. Unfortunately, whatever it is you're doing to hide yourself has one little flaw—sprites, those mysterious creatures of the Matrix, can spot you instantly, exactly as if you weren't running silent at all.

Programs:

- Stealth: +1 Sleaze
- Lockdown: Link-lock someone you attack automatically.
